ABOUT NIMBUS EQUIPMENTS

Your Trusted Partner in Complete Industrial Compressed Air Solutions

Welcome to Nimbus Equipments, a growing industrial compressed-air solutions company dedicated to helping industries achieve reliable, efficient and dependable compressed-air performance.

THE VISION BEHIND NIMBUS

After spending significant time working closely with manufacturing plants, maintenance heads, and production teams, a common challenge became evident across the industry: finding truly reliable air compressor systems backed by dependable, technically competent support was never easy.

Many facilities struggle with frequent breakdowns, mismatched equipment, high energy bills, and suppliers who disappear after delivery.

Nimbus Equipments was founded to solve this operational bottleneck.

Our vision is simple yet focused: to become a trusted technical partner for your plant by delivering **superior** equipment, responsive technical service, and sustainable long-term value — not just another machinery supplier.

TRUSTED PARTNER

Your plant's goals are our priority.

RELIABLE SOLUTIONS

Quality equipment and genuine support.

TECHNICAL EXPERTISE

Skilled team, deep industry knowledge.

LONG-TERM VALUE

For a more efficient and productive tomorrow.

OUR ENGINEERING APPROACH RIGHT SIZING FIRST

We strongly believe that the right compressor never starts with a product brochure; it starts with a deep understanding of your **actual air requirement, working pressure, and operating profile.**

**AIR
REQUIREMENT**

**WORKING
PRESSURE**

**OPERATING
PROFILE**

WHY CHOOSE US?

“When a compressor stops, the problem isn’t just the machine — it’s the production that stops with it.”

Before you invest in a new machine, you need a trustworthy engineering solution — not just another product.

At Nimbus Equipments, our focus is not simply on supplying equipment — it’s on **powering your plant with zero downtime.**

“Avoid the risk of undersized air delivery or paying extra on electricity.”

Share your application details or machinery requirements with us. Our application engineers will calculate your net CFM load and specify the exact, zero-downtime system engineered for your plant.

We help maintenance and plant teams quickly identify and select the right compressed air systems for their facilities, cutting down the time spent searching, evaluating, and waiting.

RIGHT SIZING

Engineered for your actual air demand.

ENERGY EFFICIENCY

Optimized for lower operating costs.

ZERO DOWNTIME

Reliable systems. Continuous production.

EXPERT SUPPORT

From selection to service and beyond.

Recip Air Compressor Range

Nimbus Equipments supplies reciprocating piston compressors across a wide horsepower range — from small workshop units to heavy-duty industrial systems. Each type is engineered for specific applications, duty cycles, and performance requirements.

NIMBUS RECIPROCATING PISTON AIR COMPRESSORS

SINGLE STAGE

1 HP – 3 HP

Pressure:

 Up to 8.5 Bar

NRS Model

Applications:

-  Garages
-  Service Centres
-  Pneumatic Tools
-  Light Industries

TWO STAGE

3 HP – 15 HP

Pressure:

 Up to 12 Bar

NRT Model

Applications:

-  Manufacturing
-  Fabrication
-  Engineering Industries
-  Production Facilities

MULTI STAGE HIGH PRESSURE

10 HP – 40 HP

Pressure:

 Up to 40 Bar

NHP Model

-  Process Industries
-  Heavy Engineering
-  High Pressure Air Systems
-  Specialized Industrial Applications

Ideal for intermittent-duty applications, workshops, and general industrial use where peak air demand varies throughout the day.

SINGLE STAGE AIR COMPRESSORS

Power Range: 1 HP – 3 HP

Working Pressure: Up to 8.5 Bar (115 – 125 PSI)

Model	Motor Power (HP / kW)	FAD (CFM)	Working Pressure	Receiver Tank (Ltr)	RPM
NRS-01	1.0 HP / 0.75 kW	3.5	8 Bar (115 PSI)	45	900
NRS-02	2.0 HP / 1.5 kW	7	8 Bar (115 PSI)	100	850
NRS-03	3.0 HP / 2.2 kW	10	8.5 Bar (125 PSI)	160	850

TWO-STAGE AIR COMPRESSORS

Power Range: 3 HP – 15 HP

Working Pressure: Up to 12 Bar (175 PSI)

Design: Heavy-duty, slow RPM, dual-stage compression for continuous industrial duty.

Model	Motor Power (HP / kW)	FAD (CFM)	Working Pressure	Receiver Tank (Ltr)	RPM
NRT-03	3.0 HP / 2.2 kW	9	12 Bar (175 PSI)	160 / 220	850
NRT-05	5.0 HP / 3.7 kW	16	12 Bar (175 PSI)	220 / 250	850
NRT-07	7.5 HP / 5.5 kW	24	12 Bar (175 PSI)	250 / 300	750
NRT-10	10.0 HP / 7.5 kW	35	12 Bar (175 PSI)	300 / 500	720
NRT-15	15.0 HP / 11.0 kW	52	12 Bar (175 PSI)	500	700

KEY FEATURES

Graded Cast Iron Construction

Heavy-duty cylinder blocks and deep-finned crankcase provide maximum wear resistance, structural rigidity, and long service life.

Low-RPM Belt-Driven Engineering

Conservatively rated pump speeds (700 – 900 RPM) drastically reduce friction, mechanical vibration, and thermal stress.

100% Copper-Wound Industrial Motor

High-torque 4-pole (1440 RPM) motor designed for reliable starts, continuous thermal endurance, and lower power consumption.

High-Efficiency Inter-Cooler & Deep-Fin Cooling

Aerodynamic flywheel fan combined with multi-stage finned cooling tubes ensures rapid heat dissipation and lower discharge temperatures.

Precision-Balanced Crankshaft Assembly

Dynamically balanced crankshaft with heavy-duty anti-friction bearings minimizes vibration and protects internal moving parts under pressure.

Advanced Splash Lubrication System

Continuous oil mist delivery to connecting rods, wrist pins, and bearings guarantees trouble-free continuous operation.

Stainless Steel Reed Valve Plates

Precision ground, heat-treated valve design ensures high volumetric efficiency, smooth airflow, and extended leak-free life.

Comprehensive Operational Safety

Equipped with certified pressure relief valves, an unloader pressure switch for smooth starting, and a fully enclosed steel belt guard.

Note: Due to continuous product development, specifications, dimensions, and weights are subject to change without prior notice.

MULTI-STAGE HIGH PRESSURE AIR COMPRESSOR

Power Range : 10 HP – 40 HP
Working Pressure : 30 Bar – 40 Bar (435 – 580 PSI)
Design : Heavy casted multi-stage design engineered for PET blowing & high-pressure testing applications.

TECHNICAL SPECIFICATIONS — NHP SERIES

Model	Motor Power (HP / kW)	FAD (CFM)	Working Pressure	Receiver Tank (Ltr)*	RPM
NHP-100	10.0 HP / 7.5 kW	25	30 Bar (435 PSI)	300 / 500	850
NHP-150	15.0 HP / 11.0 kW	38	30 Bar (435 PSI)	500 / Base Mounted	850
NHP-200	20.0 HP / 15.0 kW	52	40 Bar (580 PSI)	Base Mounted (Separate Tank)	750
NHP-250	25.0 HP / 18.5 kW	70	40 Bar (580 PSI)	Base Mounted (Separate Tank)	720
NHP-300	30.0 HP / 22.0 kW	85	40 Bar (580 PSI)	Base Mounted (Separate Tank)	700
NHP-400	40.0 HP / 30.0 kW	115	40 Bar (580 PSI)	Base Mounted (Separate Tank)	700

Note:

High-pressure vertical air storage vessels 300L, 500L, 1000L available separately with hydrostatic test certificates).

TYPICAL APPLICATIONS

PET Blow Moulding
Specialized compressed air supply for PET bottle manufacturing plants.

Hydro & Pneumatic Testing
High-pressure testing of valves, pipes, cylinders, and boilers.

Defense & Marine Operations
High-pressure engine starting, breathing air cylinders, and specialized industrial test benches.

KEY FEATURES

Multi-Stage Compression (Up to 40 Bar)
Distributes high compression loads across multiple stages to minimize thermal stress and deliver sustained peak pressure for PET and testing applications.

Heavy-Duty Cast Iron Construction
High-tensile cylinder block, reinforced heads, and rigid crankcase built to withstand continuous high-pressure duty without mechanical fatigue.

Finned Inter-Coolers on Every Stage
High-efficiency copper cooling tubes between compression stages rapidly lower air temperature and improve volumetric efficiency.

Ultra-Low Operating Speed (680 – 850 RPM)
Slower pump speed significantly reduces cylinder wear, extends piston ring life, and minimizes oil carryover.

High-Grade Stainless Steel Disc Valves
Precision-engineered, heat-treated valve discs designed for positive sealing and zero leakage under extreme pressure cycles.

Independent Stage Safety Protection
Every compression stage is equipped with a dedicated pressure relief valve for fail-safe industrial operation.

Serving Industrial Requirements

Nimbus Equipments serves a wide spectrum of industries — from automotive and engineering to pharmaceuticals and food processing. Our solutions are tailored to the specific air quality, pressure, and reliability demands of each sector.

Industries We Serve

Automotive

Manufacturing

Engineering

Fabrication

Pharmaceutical

Food Processing

Packaging

Plastic

Printing

Cement

Chemical

Electronics

Steel

Chemical

General Industry

Our Approach

Understand

We understand your requirements in depth.

Inspect

We inspect your system and analyze performance.

Recommend

We recommend the right solution for your needs.

Supply

We supply quality products and genuine spare parts.

Support

We provide continuous support for reliable performance.

NIMBUS
— EQUIPMENTS —
— INDUSTRIAL AIR COMPRESSOR —
SPARE PARTS & SERVICE SOLUTIONS

Let's Power Your Compressed Air Requirements

Whether you need a new compressor, spare parts, scheduled maintenance, an AMC contract, professional installation, breakdown repair, or a rental solution — Nimbus Equipments is ready to support your industrial compressed-air requirements with the right products, expertise, and service.
